This machinery unwinds the reinforcement safety and easily. Using this equipment the operator doesn’t need to move shaft or metal cones, so the operator works in safety.

Main features:
- No shaft system
- Device for automatic centering of the reinforcement
- Safety device to avoid accidental opening
- Signal for end-bobbins
- Bobbin weight: 2000Kg
- Roll core diameter from: 65 mm to 190 mm
- Maximum roll diameter: 1,400 mm
- Maximum core length: 1,250 mm
