

Grinder

The machinery that we conceived, designed, developed and patented allows us to have, with low energy costs and thus reduced environmental impact, recycled material to for reuse in the production cycle with appropriate machinery in different sectors where it's still uses bitumen based products. The materials processed with the machine are: bituminous, scraps of bituminous membranes, shingles based bitumen processing waste tiles bitumen based.

This machine transforms the bituminous waste material into chips

Technical Specifications

- Capacity up to 600 kg / hr
- Installed power: maximum 30 Kw
- Dimensions: 3000 x 2500 x 7500 mm
