

Reinforcement Unwinder

This machinery unwinds the reinforcement securely and easily. Using this equipment the operator doesn't need to move shaft or metal cones, so the operator works in safety conditions.

Main features:

- no shaft system
- device for automatic centering of the reinforcement
- safety device to avoid accidental opening
- signal for end-bobbins
- tension control system
- roll core diameter from: 65 mm to 190 mm
- maximum roll diameter: 1,400 mm
- maximum core length: 1,250 mm
