

Reinforcement Unwinder

This machinery unwinds the reinforcement securely and easily. Using this equipment the operator doesn't need to move shaft or metal cones, so the operator works in safety conditions.

Main features:

- no shaft system
- device for automatic centering of the reinforcement
- safety device to avoid accidental opening
- signal for end-bobbins
- tension control system
- roll core diameter from: 65mm to 190mm
- maximum roll diameter: 1,400mm
- maximum core length: 1,250mm
